SUPPORT SERVICE GOALS

The proper and orderly management of auxiliary services is essential to the effective and efficient operation of the school district.

Support services are intended to be truly supportive of the major goal of public schools, that is, the education of children. To that end these goals are established:

1. To provide a physical environment for teaching and learning that is safe and pleasant.
2. To provide safe transportation to and from school for eligible student riders.
3. To make available nutritious meals for students within the scope of the federal lunch program.
4. To coordinate resources and assistance for a timely response to the need for support service that fulfills the needs of the educational program and the safety and welfare of all school personnel.
