PROFESSIONAL STAFF ORIENTATION

The Superintendent of Schools and building administrators shall plan an orientation program preceding the opening of school for all professional staff members. The orientation shall be designed so as to review and update the expectations of the school district and the individual buildings. The orientation shall include an explanation of the evaluation procedure.

Building administrators are encouraged to continue the orientation process, particularly with new teachers, until all procedures are adequately presented and as long as personal growth activities continue to create interest among the staff.
