PROFESSIONAL STAFF ASSIGNMENTS AND TRANSFERS

It is the intent of the school board that professional personnel be assigned with appropriate consideration for the well being of the school district, particularly the program of instruction. The Superintendent of Schools is delegated the responsibility to assign personnel with consideration to their qualifications, the needs of the district, and the expressed desire of the individual. It is understood that the expressed preference of the employee is the last consideration, and used when all other considerations are considered equal.

Transfers

Professional staff members may request the Superintendent of Schools for a transfer according to the conditions specified in the agreement between the school board and the bargaining unit, or in the case of non-bargaining unit personnel according to the regulations.
