PEDICULOSIS

In the event a child has pediculosis, the following procedures are to be followed:

1. The child is to be sent home from school as soon as appropriate arrangements can be made with the parent or guardian.

2. The parent or guardian is to receive Salem School District Notice of Dismissal SSD H2 1982 signed by the school nurse and dated.

3. The child is excluded from school until the conditions of the notice are met.

In the event there are several cases of pediculosis and it is deemed by the principal that notices should be sent to a classroom of students or the entire school population, Salem School District Letter SSD H3 1982 will be used. The letter is to be dated in the building at the time it is issued and the use of a date stamps is satisfactory.

The Salem School District has made available for use in each school an INNOMED Pediculosis Detection Kit. The kit is helpful for detection, but is particularly useful in demonstrating for parents the presence of pediculosis.

The Salem School District personnel shall not send home notices or samples of products distributed by sales personnel or vendors.
