Swing Low/O When the Saints/I Wanna Sing

It's always very satisfying when well-known tunes fit together. This is a great example. You can sing the three elements one after the other and layer them up as a round, or give three sections one tune each.

As with any songs that are quick and easy to learn, the fun comes what you do next: experiment with dynamics, tempo, actions or even silly voices. Anything that breaks the ice and gets singers singing.
