Course Description
The Career Internship is a work-based situation which allows a student an opportunity for a real work experience in conjunction with a classroom teacher, a work-site mentor, and a Work Based Learning (WBL) Coordinator. This team will coordinate academic and occupational skills that a student will learn and apply on the job. The philosophy and intention of the WBL program is to provide students with a meaningful workplace experience, working closely with a professional in a chosen field. Class work is meant to supplement and compliment the experience, therefore it is expected that students will attend class when scheduled and complete all work as assigned.
